OFFICER FITCH EFFECTS IMPORTANT ARREST

Jesus Hernandez Flashes Gun in Officers Face and Gets Knockout for his Pains.

Special Officer Fitch of the Santa Fe railroad, made a very important capture last evening when he arrested Jesus Hernandez on a charge of carrying concealed weapons.

Fitch was on his motorcycle and was making his rounds through the yards when he saw a bunch of men fighting. Steering his mount in between the combatants he succeeded in separating them. One of the men ran and hid in a clump of brush and when the officer went to find him, the man ran out of his hiding place and flashed a gun in the officers face. Fitch hit the man a terrific blow with his fist and knocked him out and when the officer examined the gun he found that it was a .45 fully loaded.

Placing the man upon the tank of his machine, the officer brought his prisoner to the county jail in very short time. Hernandez will be given a hearing tomorrow before Judge C. W. Johnstone on a charge of carrying concealed weapons.

FINANCES AND MARKETS

[ASSOCIATED PRESS DISPATCH]
NEW YORK, August 18.—On a comparatively small volume of buying, the stock market advanced in all quarters of the list during the fore part of today's session. The supply appeared scant under the lead of coppers and strangers and the market forged ahead easily. In addition to the standard issues, oil and electric stocks made substantial gains. In spite of the improving tendency the traders were not inclined to follow the markets advance and profit taking, together with some renewed bear selling cut into the days gains bringing back the prices in some instances to the opening level. The final dealing quotations were lifted again, but at the close fell short of the days high figures.

Reports of rain in the drought regions constituted the principal factor in the day's rise. Improved outlook in the money market during the crop moving season was an influence in the stimulation of the bullish sentiment. In the same category of favorable factors was the report of the exports of domestic products in July showing a total of \$47,739,000 compared with \$33,918,000 last year. The Wells Fargo & Co. express made a further decline dropping nearly ten points, a new local record. In 1908 this stock sold at 67. Bonds became irregular after an early showing of firmness. Total sales represented a par value of \$940,000. United States bonds were unchanged on call.

How to Destroy the Dandruff Germ

BY A SPECIALIST.
That the dandruff germ is responsible for nearly all the diseases to which the scalp is heir, as well as for baldness and premature gray hair, is a well known fact, but when we realize that it is also indirectly responsible for many of the worst cases of catarrh and consumption we appreciate the importance of any agent that will destroy its power. We are, therefore, particularly pleased to give herewith the prescription which an eminent scientist states he has found, after repeated tests to completely destroy the dandruff germ in from one to three applications. It will also almost immediately stop falling hair and it has in numerous cases produced a new hair-growth after years of baldness. This prescription can be made up at home, or any druggist will put it up for you: 6 ounces Bay Rum, 2 ounces Lavender de Compose, one-half drachm Menthol Crystals. Mix thoroughly, and after standing half an hour it is ready for use. Apply night and morning, rubbing into the scalp with the fingertips. If you wish it perfumed, add half a teaspoonful of Tokalon Perfume, which unites perfectly with the other ingredients. While this preparation is not a dye, it is unequalled for restoring gray hair to its original color.—Adv.

TWO MORE CONVICTS GIVE JOE BUSH THE SLIP

Roy Barrett Much Tattooed and Texas Thompson Escape From Wood Chopping Detail.

Roy Barrett and Tex Thompson, two prisoners confined in the stockade at Tempe, made their escape yesterday afternoon and up to a late hour this morning had not been captured. The two men were detailed yesterday afternoon to go out to the river bank for the purpose of cutting wood for the cook house. After leaving the sight of the guards they threw down their tools and made a break for liberty. They took to the water and thus threw the guards off the track.

It is supposed that the men had outside assistance and were enabled to change their clothes. This fact alone will make their recapture very hard.

Captain Joe Bush, in charge of the stockade, as soon as he heard of the escape, sent messages to all the sheriff's offices in this state with a description of the men. The following is the description as given by the penitentiary authorities: Roy Barrett, American, dark complexion and hair, height about 5 feet 1 inch, and is covered with tattooing, has the nude figure of a woman on the forearm with an anchor, and has an American Eagle on his chest. Tex Thompson is about 5 feet 11 inches in height, light complexion and hair and has no marks on his body.

Anyone seeing men answering to this description is requested to communicate with Sheriff Jeff Adams, Phoenix, or Captain Joe Bush at the stockade at Tempe.

DISTURBER ARRESTED.—Joe Throm, who claims to be a resident of Glendale, started on a trip to Clifton. Before his train started, however, he tried to drink up all the whiskey there was in town with the result that when he boarded the train he so far forgot himself as to use language in front of the ladies on the train, that was the reverse of polite. Officer Perry was called by the train crew to eject the man. This Throm did not like and he told the officer that his, Perry's, family history was not of the best. After being removed from the train Throm thought that he would add to his transgressions by more abuse and refused to walk to the county jail. Throm will be given a hearing today before Judge Johnstone on a charge of using profane language and resisting an officer.

EVEN THERE.
Just as soon as a man succeeds in getting on Easy street somebody comes along and begins to tear up the pavement there.—Chicago Record-Herald.

AMUSEMENTS

Empress.
Helter Skelter is the name of the little skit which was up for its initial at the hands of the Bowker Tabloid Musical Comedy Co. last evening and which will run for the first part of the week. As its name designates, it is an accumulation of fun, arranged and presented for the sole purpose of making the audience laugh, and it succeeded well in its mission. The comedy lines are handled by Jimmie Gibson, as an Irish character and William Lawson up for Hebrew work. These two gentlemen have long since demonstrated their ability in their particular lines of endeavor, and the present offering gives them both opportunity for producing laughs, which they do with a rush. The song numbers aside from being the latest hits, were put over in a manner that leaves nothing to be desired. The chorus worked with a snap that added materially to all the numbers.

The moving picture program is entirely new, an especially pleasing subject being a scenic release from the Pathe studios showing scenes through Montana, laying especial stress on the mining scenes in and around Butte. The Vitagraph presentation was in the shape of a drama of the highest order.

Coliseum

The regular weekly change at the Coliseum will have its initial opening this evening, when three big new acts all features will make their appearance. Hunter and Reeves, refined entertainers, will offer a catchy singing, talking and comedy skit. Woods Musical Trio, are musicians of some note, and the music lovers of Phoenix will now have an opportunity to enjoy themselves throughout the coming week. The act features Edith, "The girl behind the drums", who has won much fame with her clever drum work. Little Olga, the European acrobat will complete the bill with aerial and gymnast work. The act features Edith, "The girl behind the drums", who has won much fame with her clever drum work. Little Olga, the European acrobat will complete the bill with aerial and gymnast work.

The Hart

"A Life for a Life" opened at the Hart last evening to a capacity house, the consensus being that it is the best play that as yet has been produced by this sterling little company. Miss Vesta Hart as "Kate," the operator, handled her part in fine style, while Dan Hosmer as "Garcia" was at his best. Harvey Hart as the sheriff pleased the patrons of the house in his very acceptable interpretation of that character. The song hits of the evening were "The Trail of the Lonesome Pine," sung by Miss Millie Hart, Miss Tete Hart, and "Smile Awhile" Jack Brady was accorded several encores. The pictures as usual were exceedingly good. The public is appreciating the daylight shows of pictures from the increase in attendance. The General Film company offerings are always of the best.

"Leads the Best by Every Test"

A Fabulously Rich Limestone Deposit Breathing a Story of Real Romance

AR UP in the Pinal mountains, nestling close to the unique little town of Winkelman, a hundred miles from the capital of Arizona and with the best transportation facilities possible, lies the most valuable limestone quarry known in the southwest. The quarry is the base and foundation of one of Arizona's coming industries, the cement business, and is owned and controlled by the Arizona Portland Cement Company of Phoenix.

Considerable romance attaches to the limestone quarry in the Pinals. The entire country in the neighborhood is of a limestone formation, the outcroppings show practically everywhere and the mountains in some places are veritable limestone hills. Such is the mountain owned by the Arizona cement company and from which all of the limestone comes which goes to make up the wonderful product now being placed on the Arizona market in competition with that shipped in from other states.

The country in and around the limestone district has been known for many years to hardy prospectors, miners and freighters who have made it their business to investigate the most out of the way places in the country. The prospector, in his vain and successful hunts for copper and gold, came across the limestone and passed it by, seeking a stake by which he could live in peace and luxury the balance of his days. The immense quarries of the rock were passed by with a blink and a nod and the forecast by practically all that it would someday be valuable.

Long since has the predatory Apache ceased to bother the prospector and the freighter. Long since have the barren wastes of the fringe of the Pinal mountains ceased to be formidable, for steel has conquered all. The railroads, the automobiles, backed with capital and good judgment, forcing their way to some of the best copper properties in the world, have tapped one of the richest finds in the country, namely the immense and never ending limestone deposit.

The exact locating of the quarry is in doubt. Pinal history and legend has it that the limestone was hauled many years ago from the exact location of the quarry today into the towns on the fringe of the desert and baked into lime, and used for the elevation of civilization. Sure it is that the lime used by the very old settlers in Pinal county, and in other nearby parts of Arizona, was received from the neighborhood of the Pinals.

Several years ago a man, interested in the cement industry and in the upbuilding of the state of Arizona from within as well as without, bethought himself of the excellent opportunity of making the quarry yield a toll to the increasing people of Arizona. It was at the time that the United States government was dismantling their cement plant at Roosevelt.

The man gathered a coterie of practical and dreaming men around him and proceeded to organize a company to buy the plant, to erect it and to secure the best limestone quarry in the country for the base of the cement. The first step was the purchase of the quarry. This was negotiated with little trouble and has since been the property of the Arizona Portland Cement Company.

The quarry, as has been stated before, is located just outside of Winkelman. It is also located immediately on the Arizona Eastern, so as to render transportation feasible and economical.

Gondola flat cars are placed on the siding at the quarry, a blast is put off on the side of the hill and in a short time limestone is falling into the cars ready for transport to Phoenix.

The Pinal limestone is said to be the best in the west. Its composition has been looked into very carefully by the best of assayers and cement experts and was long ago pronounced as being one of the best grades of native limestone yet found for cement making purposes.

Its composition consists of silica, alumina, iron oxide, lime and magnesia. With the cement mill running full capacity, making five hundred barrels daily, 160 tons of limestone will be shipped from Winkelman every 24 hours. E. C. Grasty is the superintendent of the limestone quarry, with headquarters in Winkelman.

people have given the best within them and have turned from the reel of one of the strongest modern-day dramas ever written for a picture. The story and name are at odds for there is little in the name that even suggests the real truth of the story. That he may write powerful books and that his brain can work faster and see the things that he dreams of, the author hero of the story begins to use opium with the results that he puts forth a book that is pronounced a failure instead of one that should have made him famous. Instead of crystallizing his thoughts, the drug had deadened his brain, and he was unable to give the best within him. at the Lion tonight.
